

For years I have watched the corporate consolidation of radio stations, television stations and print media. It has become alarming. We have been and need to remain a nation of many voices. One of the safest ways to assure that we remain so is to encourage as wide a diversity of media ownership as possible instead of allowing the corporate acquisition and homogenization of our media outlets. Please do not loosen the restrictions on media ownership...MAKE THEM TOUGHER!!!!!!!!!!!!!! I believe that no one person, family, business or corporation should be allowed to own more than one media outlet OF ANY KIND in any community. Freedom of thought is paramount and so is the requirement that the government provide equal access to all forums for the expression of our thoughts. When the government allows multiple ownership of media outlets within a community it is failing in it's duty to protect our freedom of thought
